UNIFORM CRIME REPORTS

J. Edgar Hoover, Director, Bureau of Investigation

United States Department of Justice

Washington, D. C.

Volume 2 December, 1931 Number 12

Special Announcement.

At the suggestion of Dr. L. C. Marshall, of the Institute of Law of The Johns Hopkins University, a conference was held December 28 in the offices of the United States Bureau of Investigation for the purpose of considering the possibility of securing a uniform classification of crimes for use in penal, judicial, and police statistics. At the present time the United States Bureau of Investigation of the Department of Justice is developing a system of crime statistics based on offenses known to the police, while the Bureau of the Census in the Department of Commerce has for years compiled criminal statistics on a national scale concerning inmates of State and Federal institutions. The classifications used by the two bureaus, although not exactly similar, have substantially the same group headings. The purpose of the conference was to determine whether some action might be taken with a view to developing a classification common to both fields of statistics which at the same time could be utilized in compiling judicial statistics. The following were in attendance in addition to representatives of the United States Bureau of Investigation: L. C. Marshall; Leonard V. Harrison; Thorsten Sellin, representing the Bureau of the Census; Bennet Mead; William P. Rutledge; Lawrence B. Dunham; W. C. Jamison; Miss Harriet Cheney; A. H. MacCormick; E. H. Sutherland; Bruce Smith; and Charles E. Gehlke.

It was agreed by the conference that it would be highly desirable to have a uniform offense classification which may be utilized in police, judicial, and penal statistics although there are many difficulties to be encountered in providing such a classification. The conference felt, nevertheless, that to obtain a comparable offense classification some progressive action should be taken as soon as possible, and accordingly a committee was appointed to consider the details of the problem and to submit its findings to the conference at a later date. This committee is composed of Dr. L. C. Marshall, of the Institute of Law of The Johns Hopkins University; Mr. Bruce Smith, of the Institute of Public Administration; Dr. Thorsten Sellin, of the Bureau of Social Hygiene, representing the Bureau of the Census; and Mr. James J. Waters, of the United States Bureau of Investigation.

Contents of the December Bulletin.

This issue of the bulletin contains the usual tables of offenses known to the police as tabulated from the reports furnished the United States Bureau of Investigation by contributing police officers. These consist of Table I, or the number of offenses reported by urban police departments, Table I-A, the number of crimes reported by counties, United States possessions, and others, Tables II and II-A, which include the supplementary returns from urban police departments, counties and others, and Table II-B, in which will be found returns previously published which are revised in the current issue. In addition thereto a tabulation is included showing the total number of offenses for the calendar year of 1931 as reported by cities having a population of 100,000 or more from which reports were received for the entire 12 months of that year. The bulletin also contains a tabulation showing the number of police department employees in cities of two population groups, namely, those of 10,000 to 25,000 and those of 25,000 to 50,000.

The remaining tables of the bulletin show the extent of the population area covered by the statistics in the above tables, the total number of current and supplementary reports that have been received from police departments during the year, the average daily number of offenses for cities which have submitted returns for both November and December, and the per cent of each offense class to the total number reported.

In publishing the reports sent in by chiefs of police in different cities, the Department of Justice does not vouch for their accuracy. They are given out as current information which possibly may throw some light on problems of crime and criminal law enforcement.

The term "Offenses known to the police" is designed to include those crimes designated as Part I Classes of the Uniform Classification occurring within the police jurisdiction, whether they become known to the police through reports of police officers, of citizens, of prosecuting or court officials, or otherwise. They are confined to the following group of seven classes of grave offenses, shown by experience to be those most generally and completely reported to the police: Felonious homicide, including (a) murder, nonnegligent manslaughter, and (b) manslaughter by negligence; rape; robbery; aggravated assault; burglary—breaking or entering; larceny—steal, including (a) thefts of \$50 and over and (b) thefts of under \$50; and auto theft. The figures contained herein include also the number of attempted crimes of the designated classes. Attempted murders, however, are reported as aggravated assaults. In other words, an attempted burglary or robbery, for example, is reported in the monthly bulletin in the same manner as if the crime had been completed.

"Offenses known to the police" include, therefore, all of the above offenses, including attempts, which are reported by the police departments of contributing cities, and not merely arrests or cleared cases.

Population Table.

The number of cities which at any time during the year 1931 have contributed returns of offenses known to the police to the Bureau of Investigation reached 1,511 in December. These cities represent a population of 51,145,734. This figure, of course, excludes the popu-

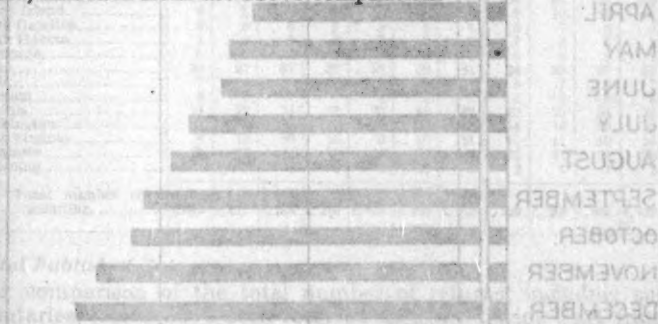

lation represented by returns received from county and other jurisdictions. Returns were also received from a number of counties in the various States, State police in several jurisdictions, the third division of Alaska, Canal Zone, and Porto Rico. Supplementary returns were forwarded from various other possessions. In the following table are shown the number and per cent of the cities and the number and per cent of the population of those cities of more than 10,000 inhabitants from which returns have been received for any one month of 1931. In addition to those listed in the table there are 741 cities of the smaller population groups and rural townships representing an aggregate total population for both groups of 4,262,409, which also contributed returns at some time during the current year.

Population groups	Total number of cities or towns	Cities filing returns		Total population	Population represented in returns	
		Number	Per cent		Number	Per cent
Total.....	963	770	78	88,340,077	46,883,325	80
A. Cities over 250,000.....	37	34	92	23,764,770	21,230,815	74
B. Cities 100,000 to 250,000.....	66	64	96	7,640,936	7,288,587	97
C. Cities 50,000 to 100,000.....	98	91	93	6,491,448	6,010,291	93
D. Cities 25,000 to 50,000.....	180	161	87	6,435,693	5,658,548	88
E. Cities 10,000 to 25,000.....	606	430	71	9,097,200	6,595,139	72

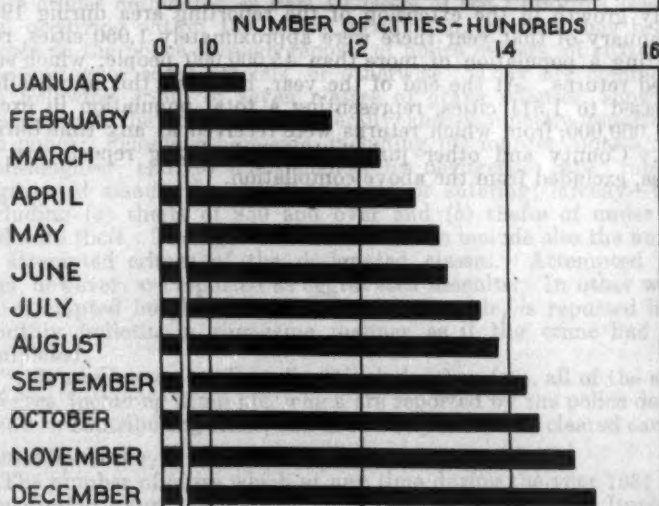

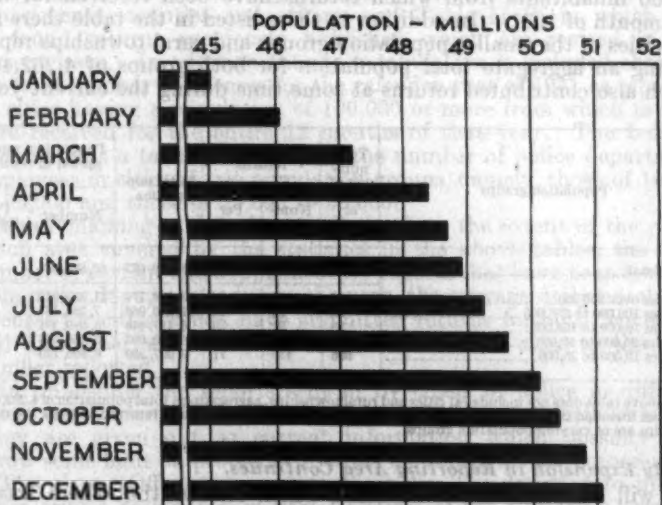

The above table does not include 741 cities and rural townships, aggregating a total population of 4,262,409. The cities included in this figure are those of less than 10,000 population filing returns, whereas the rural townships are of varying population groups.

Steady Expansion in Reporting Area Continues.

It will be noted from the chart which follows that there was a steady growth in the extension of the reporting area during 1931. In January of that year there were approximately 1,050 cities, representing a population of more than 45,000,000 people, which submitted returns. At the end of the year, however, this number had increased to 1,511 cities, representing a total population in excess of 51,000,000, from which returns were received at any time during 1931. County and other jurisdictions submitting reports are, of course, excluded from the above compilation.

REPORTING AREA AND POPULATION REPRESENTED 1931

Continued Increase in Number of Reports Received.

The number of reports received by the Bureau of Investigation for the month of December from urban police departments was 1,352, an increase of 19 over the total number received at the time of going to press for the November Bulletin. Twenty-six of these reports were from cities which had not previously contributed crime statistics to the U. S. Bureau of Investigation. In the following table there is set forth a comparison by States of the total number of returns received currently by months during 1931. Supplementary returns are excluded from this tabulation.

Total Published Returns.

A comparison of the total number of returns, including supplementaries, which have been received monthly during 1931 from the various States, is set forth in the following table. As distinguished from current returns, supplementary returns are those which have been received for months previous to December since the last issue of the bulletin.

In order to make available complete statistics covering the entire reporting area for the whole year, it is requested that police departments which have heretofore failed to do so, forward, if possible, the data for the months previous to December.

Average Daily Offenses.

The daily average of the number of offenses known of the designated classes, as reflected in the following table, is based upon the figures submitted by 1,247 cities which contributed both in November and December. Due allowance was made for the variance in the number of days in each of the foregoing months.

Daily average, 1,847 miscellaneous cities

	Total	Felonious homicide		Rape	Robbery	Aggravated assault	Burglary—breaking or entering	Larceny—thrift		Auto theft
		Murder, nonnegligent manslaughter	Manslaughter by negligence					\$50 and over	Under \$50	
November, 1931...	2,088.2	8.3	6.5	5.7	153.3	62.5	437.7	156.2	743.3	514.7
December, 1931...	2,087.9	8.5	7.3	5.0	177.4	58.1	463.9	148.0	731.0	488.8

The next table of daily averages is based upon figures submitted by 1,171 cities, each having a population of less than 100,000, which contributed returns both in November and December.

Daily average, 1,171 cities less than 100,000 population

	Total	Felonious homicide		Rape	Robbery	Aggravated assault	Burglary—breaking or entering	Larceny—thrift		Auto theft
		Murder, nonnegligent manslaughter	Manslaughter by negligence					\$50 and over	Under \$50	
November, 1931...	728.8	3.1	2.0	2.4	38.4	37.7	154.2	54.3	284.3	159.4
December, 1931...	764.8	3.6	2.1	1.8	44.8	28.3	172.9	54.6	300.8	158.2

The next table of daily averages is based upon figures submitted by 76 cities, each of a population of 100,000 or more, which contributed returns both in November and December.

Daily average, 76 cities, 100,000 population and over

	Total	Felonious homicide		Rape	Robbery	Aggravated assault	Burglary—breaking or entering	Larceny—thrift		Auto theft
		Murder, nonnegligent manslaughter	Manslaughter by negligence					\$50 and over	Under \$50	
November, 1931...	1,362.4	5.2	4.5	3.4	114.9	34.8	283.5	101.9	460.0	354.2
December, 1931...	1,323.4	4.8	5.1	3.2	133.0	31.6	290.9	98.3	436.8	330.8

Percentage Table of Part I Offenses.

The per cent of each offense class to the whole for 1931 is shown by months in the following table. These figures, however, are not intended to indicate crime trends for the particular period but merely reflect the per cent of each class of the designated crimes to the whole group for the various months. The figures are based on the total number of offenses reported by all contributing cities, exclusive of obviously defective and incomplete returns.

Per cent of offenses known, 1931

Annual Return Forms.

There have been distributed to interested police officials the necessary forms for supplying information concerning the number of offenses reported to the police and the number of persons charged during the calendar year of 1931. These forms are designated Return B and Return C. Return B provides for recording the total number of offenses known, the number of those which are unfounded, those cleared by arrest, and those not cleared by arrest for 1931. In addition thereto the number of offenses which were reported not cleared in previous years, but which were cleared in 1931, should be reported. An offense is cleared by arrest when one or more persons are charged and prosecuted for it, whether following an arrest, court summons, or police notice.

On Return C should be recorded the number of persons released by the police; that is, those persons who are taken into custody but are later released, there being no formal charge placed against them, and the number of persons charged by the police. The term "persons charged," according to the Uniform Classification of Offenses, includes all persons within the police jurisdiction against whom criminal charges are brought. These charges may be made after arrest, summons, or notice. It should be noted that both the Part I and the Part II Classes of the Uniform Classification of Offenses are used in Return C.

Tabulation of Police Department Employees.

In the table which follows there is completed the tabulation showing the number of police department employees, including civilians, of cities contributing crime statistical data to the United States Bureau of Investigation. The first section of this table included three population groups, namely: Cities over 250,000, those between 100,000 and 250,000, and those between 50,000 and 100,000. This tabulation

was published in the October bulletin. The concluding section, published in the current bulletin, includes the two population groups of cities between 25,000 and 50,000 and those between 10,000 and 25,000.

There is also included a supplement to the figures for the first three population groups which includes two cities that did not have complete data at the time of the previous publication.

As was indicated previously, the sources of the data are as follows: Population figures were obtained from the revised 1930 census. The number of police department employees shown in the table is taken from the monthly Return A and is an average for the months from January to September, 1931, inclusive. Cities from which it was impossible to obtain the data for a period of more than three months are excluded. Data furnished by cities regularly which appeared obviously inaccurate or doubtful has been disregarded.

Table A-1 is a summary indicating the average number of policemen per 1,000 population for each of the five population groups covered by the completed tabulation.

TABLE A.—Tabulation of police department employees

2. Cities of 100,000 to 250,000 population—Supplement	Population, 1930	Average number of employees per month	Number per 1,000 population
Chattanooga, Tenn.....	110,798	113	0.9
3. Cities of 50,000 to 100,000 population—Supplement	Population, 1930	Average number of employees per month	Number per 1,000 population
Atlantic City, N. J.....	66,198	257	3.9
4. Cities of 25,000 to 50,000 population	Population, 1930	Average number of employees per month	Number per 1,000 population
Albuquerque, N. Mex.....	26,570	23	0.8
Alhambra, Calif.....	29,472	45	1.5
Alton, Ill.....	30,151	33	1.1

TABLE A-I.—Average number of police-department employees for population groups

Population groups	Number per 1,000 popu- lation
Cities over 250,000.....	2. 14
Cities 100,000 to 250,000.....	1. 51
Cities 50,000 to 100,000.....	1. 38
Cities 25,000 to 50,000.....	1. 27
Cities 10,000 to 25,000.....	1. 10

Total Offenses Reported for 1931—Cities over 100,000.

The following table is a tabulation of the returns submitted for the calendar year of 1931 by cities having a population of 100,000 or more. Cities not contributing for the entire 12 months of 1931 are excluded. The data, it is believed, are of current interest and of value when reasonable caution is exercised in interpreting the figures presented.

TABLE B.—Total offenses reported for 1931—Cities over 100,000

Reports from Urban Police Departments.

In the following table are shown the number of offenses of the designated classes by State and city for the month of December, 1931, as reflected by reports submitted to the Bureau of Investigation by urban police departments. There are excluded from this table reports submitted by county sheriffs, State police, and other officers in a similar status.

Returns Submitted by County Sheriffs and Others.

In the following table will be found reports submitted by county sheriffs, State police officers, police officials in the United States possessions, and officers in a similar status. These returns are published separately because it is deemed advisable to exclude them from Table I, which contains the number of offenses submitted by police departments in cities.

TABLE I-A.—County and other reports of known offenses, December, 1931
